## FLEXLITE GX

## Natural extension to your hand

**Flexlite GX product series** contains welding guns to be used in MIG/MAG welding processes. There are Flexlite GX models available in three value levels: K3, K5 and K8. Each level is designed to serve specific welding needs. All Flexlite GX models enjoy the Flexlite features for user comfort, welding efficiency and extended consumable part life.

## Flexlite GX guns for MIG/MAG welding

Kemppi's Flexlite GX guns for MIG/MAG welding increase user comfort and welding productivity. Their innovative production methods, high quality materials and strict quality control guarantee that you can rely 100 % on your Flexlite GX welding gun.

The pistol grip handle, anatomically designed shape and excellent balance reduce wrist loading, allowing the welder to concentrate on challenging tasks to achieve the perfect weld. This has a good effect on both quality and productivity.

If you calculate the total cost of ownership for a Flexlite GX welding gun, you will see that it stands out for its long-life consumables, for its efficiency and good ergonomics, and that it clearly improves your overall welding productivity.

The Flexlite GX welding guns are available in alternative power classes and lengths, including different neck versions.

### **EXCELLENT ERGONOMICS**

Lower fatigue has a positive effect on welder's work and results in better quality and efficiency.

## **EFFICIENT** WELDING

High-performance torch uses the power source capacity efficiently and helps you create smooth and spatter-free welds.

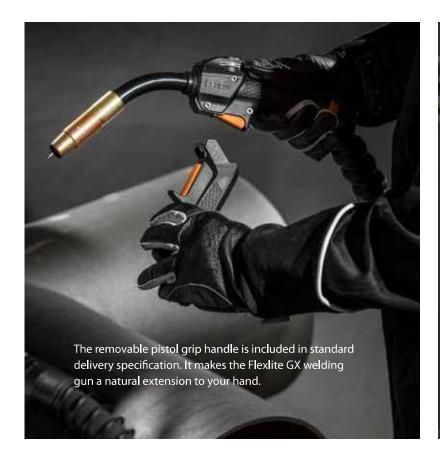

### LONG CONSUMABLE LIFE

Reliable and durable Kemppi consumable parts support welding quality and productivity.

# When it comes to usability, you know Flexlite GX makes a great choice!

Flexlite GX welding guns feature impressive shape and balance. Flexible cable sets and ball-jointed cable protection reduce wrist loading, so that you can really feel the difference. This lowers the welder fatigue and leads to increased work quality and efficiency.

# Innovative design is reflected in weld quality and welding efficiency

Flexlite GX models feature lower gun neck and contact tip temperatures. This has been achieved with a new, innovative gun neck structure, where the cooling channels run closer to the main consumables, and they are separated from the shielding gas channels.

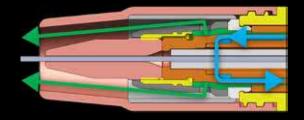

Together with high quality consumable parts, this feature elevates welding efficiency and improves the welding quality. It also extends the lifetime of consumable parts, leading to easier spare part management and savings in consumable costs.

## 35% COOLER THAN OTHERS

According to tests made in Kemppi welding laboratory, the Flexlite GX welding guns showed up to **35** % **temperature decrease** in contact tip, when compared to a corresponding non-Flexlite welding gun. This indicates that Flexlite's multi-channel cooling system plays an important role in significant lifetime improvement of consumables.

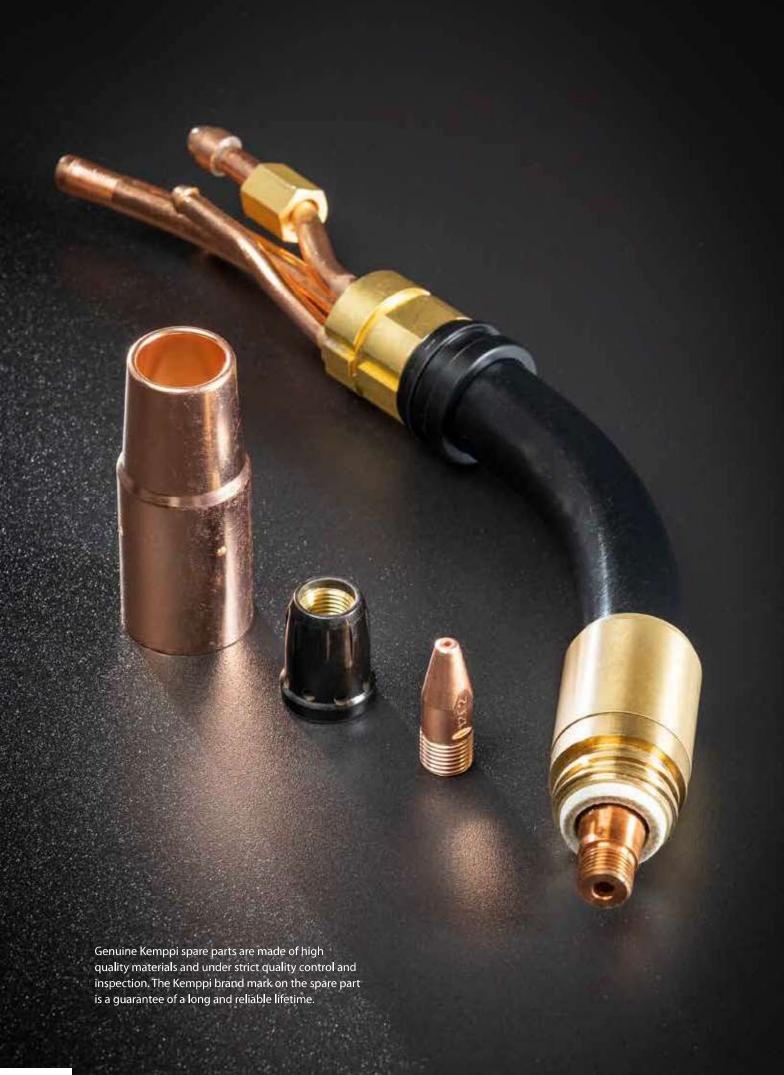

Shielding gas flow has a significant effect on weld quality. Normally shielding gas is invisible, but with Schlieren imaging technology it is possible to observe the real gas flow. This illustrates, how Flexlite GX welding gun design and consumable parts enable laminar gas flow and better shielding gas coverage.

Cooling liquid circulates close to main consumables, keeping them cooler and extending their lifetime. (Blue arrows)

Separate shielding gas channels in the gun neck enable cleaner welds, less spatters and smaller shielding gas consumption. (Green arrows)

## Less consumables means lower inventory costs

Flexlite GX welding guns feature improved thermal efficiency, which enables cooler temperatures and extended consumable lifetime and leads to more than 50 % lower consumables usage. High-performance, precision-drilled contact tips with improved wear life suit wide-ranging applications and filler wire types.

#### LESS PARTS, LOWER COSTS

The number of changeable parts has been reduced by improving cross-matching across corresponding models, and by combining the functions of some of the consumables. As a result, the total number of consumables has been reduced per individual gun models. This lowers inventory costs and makes Flexlite perfect for workshop cost management.

## Better quality and

#### **GUN REMOTE CONTROL**

Optional on-torch remote controls allow accurate and immediate welding current adjustment and memory channel selection at a distance. Available for K5 and K8 level welding guns.

#### **ERGONOMIC HANDLE DESIGN**

Anatomically shaped handle with a firm grip. A modular trigger with a few parts and simple wiring. The handle cover, trigger and gun remote control are quick and easy to change.

#### **WORK LIGHTS**

K8 level guns feature optional LED work lights to aid pre-weld positioning and post-weld visibility.

#### IMPROVED NECK COOLING

Separate shielding gas channels and the cooling circulation that is running to the end of the gun neck keep the neck cooler and enable cleaner welds, less spatters and extend consumables' lifetime.

#### LESS PARTS, LOWER COSTS

The number of changeable parts has been reduced by improving cross-matching across the models. This lowers inventory costs and makes Flexlite GX perfect for workshop cost management.

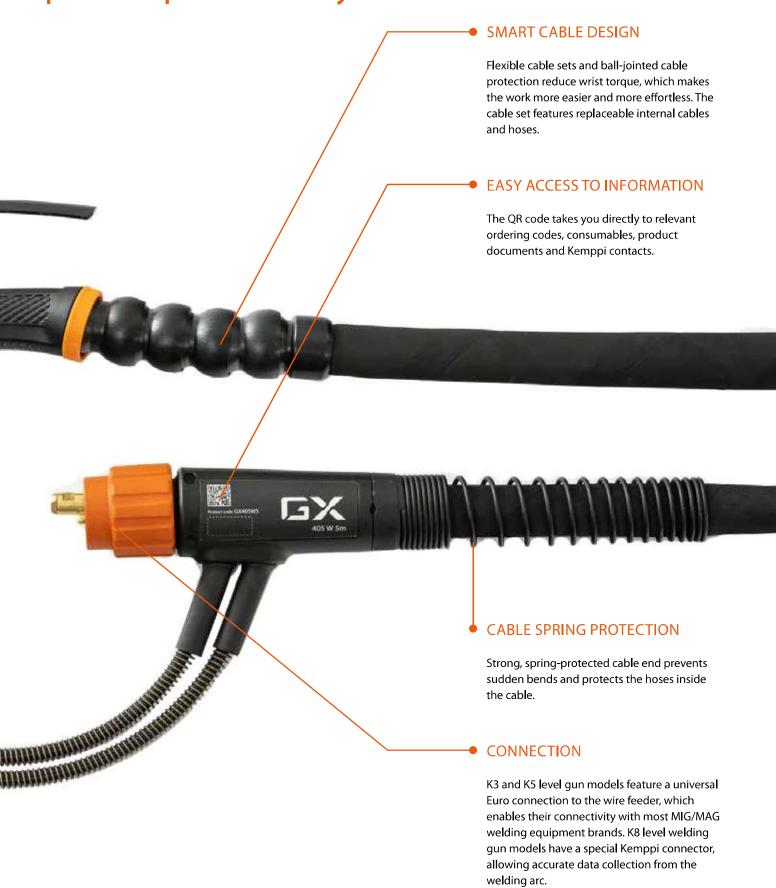

Genuine Kemppi spare parts guarantee that your welding gun serves you with maximum efficiency and quality. The Kemppi brand mark on the spare part is a guarantee of a long and reliable lifetime.

#### PISTOL GRIP HANDLE

The pistol grip handle is included in standard delivery specification. It allows a natural wrist position, which makes the work easier and more effortless, especially when doing long welds. Quick to install without tools.

## improved productivity

## Value levels – Best gun for each task

Kemppi's Flexlite GX guns for MIG/MAG welding are divided into three value levels: K3, K5 and K8. Each level is designed to serve specific welding needs. The higher the value level, the more features you get.

All value level models enjoy the Flexlite features for user comfort and extended consumable part life. Designed with superb balance, they reduce wrist loading and work fatigue. The same consumables can be used in all K-level models, which simplifies spare part management and makes it more cost-efficient.

**K8 level** models are a powerful combination of ergonomic and technical welding performance. A remote control device with a display can be bought separately. The LED work light provides better visibility in low light working conditions, aiding pre-weld positioning and postweld visibility. The gas-cooled K8 level gun range features exchangeable swan necks. The Kemppi Gun Connector offers enhanced mechanical and electrical properties together with real-time arc voltage measurement.

**K5 level** models suit a variety of professional applications and include both gas- and water-cooled models. MN stands for Multi-Neck, a fast-change gun neck system, allowing one of three neck variants to be selected and fitted to the gun handle in seconds. All K5 level models accept the optional remote control device, which provides real-time selection of welding power or memory channels during welding. Euro connector guarantees connectivity with most MIG/MAG welding equipment brands.

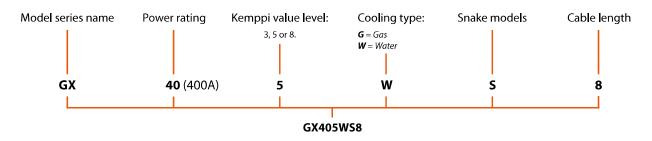

**K3 level** models are suitable for use across a wide range of materials and tasks. They are available in both gasand water-cooled models from 3 to 5 meters in length. Euro connector guarantees connectivity with most MIG/MAG equipment brands. No option for remote control.

## Improve the ergonomics and usability with Flexlite accessories

Pistol grip handle is a standard accessory included in all Flexlite GX welding gun packages. It allows a natural wrist position, which makes the work easier and more effortless, especially when doing long welds. Quick to install and remove without tools.

GXR10 Gun Remote is an on-torch remote control device for K5 level Flexlite GX welding guns. When used with a compatible welding system, it allows accurate and immediate welding current adjustment and memory channel selection conveniently from the welding gun.

Fast and easy to install, GXR10 Gun Remote can be purchased as an optional accessory for any K5 level Flexlite GX welding gun.

K8 level Flexlite GX welding guns can be equipped with a sophisticated gun remote control device GXR80 Gun Remote With Display. It has a bright and clear LED display that provides a crisp view to manage the welding parameters, memory channels and WPSs.

### Contact tips

All Kemppi's original M10 contact tips are precision-drilled, high quality consumables. The high-speed drilling produces a much smoother borehole surface, which enables smooth and reliable wire feed and extends contact tip lifetime.

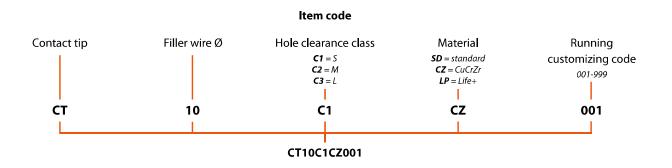

Recommended first choice								
Filler wire Ø	Ferrous wires	Stainless wires	Fluxed wires					
0.8	C1 (small)	C2 (medium)	C3 (large)					
0.9	C1 (small)	C2 (medium)	C3 (large)	C1 (small)				
1	C1 (small)	C2 (medium)	C3 (large)	C1 (small)				
1.2	C1 (small)	C2 (medium)	C3 (large)	C1 (small)				
1.4	C1 (small)		C3 (large)	C1 (small)				
1.6	C1 (small)	C2 (medium)	C3 (large)	C1 (small)				
2	C3 (large)		C3 (large)					
2.4	C3 (large)		C3 (large)					

LIFE+ contact tips last up to 5 times longer than ordinary copper tips, reducing overall costs and increasing welding time.

Each filler wire diameter includes three clearance classes: C1, C2, C3. Just select the class that is the most suitable for your application.

If you experience trouble in high-power welding, you might try selecting a bigger clearance class. A smaller clearance class may have a positive effect on ignition.

Please notice that these are recommendations only.

#### Wire liners

Kemppi wire liners are strong, durable and efficient. Designed to suit specific filler wire materials and applications, Kemppi liners support the filler wire and ensure reliable delivery to the welding arc. The liner selection tables describe gun type, filler material, liner color, ordering code and gun length. Steel spiral liners are suitable for welding solid and cored filler wires of corresponding wire diameter.

Kemppi 'DL Chili' teflon liners are the best solution for reliable feeding of aluminum, stainless steel, acid-resistant and solid steel filler wires. Kemppi's patented technology, two layer DL Chili liner material significantly reduces friction losses between the filler wire material and liner wall, ensuring reliable and worry-free feeding for listed wire types, even in welding guns up to 8 meters in length. Please refer to the following tables to ensure accurate selection of liners for your chosen welding gun and application.

#### WIRE LINERS FOR S MODELS (SNAKE)

Ordering code	Liner	Length, m	Wire Ø, mm	Material	Cooling	Note
W016311	DL Chi <b>l</b> i	6	1.0-1.2	Ss (Fe)	G/W	Best suited for Ss, works also for Fe.
W016312	DL Chi <b>l</b> i	8	1.0-1.2	Ss (Fe)	G/W	Best suited for Ss, works also for Fe.
W016301	DL Chi <b>l</b> i	6	1.0-1.2	Al (Ss)	G/W	Best suited for Al (1.2 mm).
W014061	DL Chi <b>l</b> i	8	1.0-1.2	Al (Ss)	G/W	Best suited for AI (1.2 mm).
W016408	DL Chi <b>l</b> i	6	1.4-1.6	Al (Ss, Fe)	G/W	Best suited for AI (1.4-1.6 mm), works also for Ss and Fe (up to 1.6 mm).
W014060	DL Chi <b>l</b> i	8	1.4-1.6	Al (Ss, Fe)	G/W	Best suited for AI (1.4-1.6 mm), works also for Ss and Fe (up to 1.6 mm).
