

MADE IN GERMANY

# Tungsten Grinder

## OSG Serie

With its ultra-lightweight and compact design, our Tungsten Grinder allows you to grind, cut, and square tungsten electrodes used in TIG welding anytime and anywhere, ensuring both speed and precision.

### FEATURES

- 2 different grinding angles (22,5° and 30°)
- 4 different electrode diameters (1,0 – 1,6 – 2,4 – 3,2 mm)
- Grinding, squaring and cutting function
- High angular precision through preset grinding angle for all electrodes
- Ultra-Light and rapid processing, 1 kg only
- Grinding in the longitudinal direction for optimal arc ignition and high arc stability. Guarantees a higher service life and ignition ease of the tungsten electrode.
- Specially for small batch production directly on the building site
- Precise cylindrical grinding
- Short machining times through the high grinding capacity
- Reduced work required without setup time

### DIAMOND GRINDING WHEEL

- 40CR Steel with medium grain coating
- Both sides diamond coated
- Outside Diameter 37.5mm and Inside Diameter 5mm
- Thickness: 2.4mm

## OSG Serie

### STANDARD SUPPLY AND PACKAGE

- Tungsten Grinder - 1 piece
- Grinding wheel - 1 piece
- Dust protection - 1 piece
- Hex key to replace the grinding wheel
- All sizes Tungsten Electrode Grinders are packed in cardboard for transportation and storage

### PART NUMBERS

- Tungsten Grinder : OSG220 (220V) / OSG110 (110V)
- Grinding wheel : OSGD
